

Alex Allen

Louisville, KY | calexallen12@gmail.com | calexallen.github.io (Portfolio)

PROFESSIONAL SUMMARY

Computer Information Systems senior at the University of Louisville (May 2026) with dual concentrations in Data Analytics and Cybersecurity. Hands-on experience as a Junior Systems Administrator intern at Steel Technologies, with additional skills in Python, SQL, machine learning, and digital forensics. Adaptable and ready to contribute across IT, analytics, and technology management roles.

TECHNICAL SKILLS

Languages: Python, SQL / T-SQL, HTML, CSS, JavaScript

Data & Analytics: Pandas, scikit-learn, Machine Learning, Power BI, Jupyter, Data Visualization

Security & Infrastructure: Network Security, Digital Forensics, Database Security, Active Directory, Windows Server, pfSense / VPN

Tools & Platforms: MS SQL Server, Microsoft 365, GitHub Pages, VS Code, Anaconda, Google Gemini API, ERD / UML

EDUCATION

B.S. Computer Information Systems

May 2026

University of Louisville, College of Business · Concentrations: Data Analytics & Cybersecurity · 3.25 Major GPA · Dean's List
Relevant Coursework: Network Security, Information Security, Digital Forensics, Machine Learning, Data Analytics, Database Design, Infrastructure Technology, Systems Analysis & Design, AI Agent Development

PROFESSIONAL EXPERIENCE

IT Intern (Junior Systems Administrator) | Steel Technologies

2024 – Present · Louisville, KY

- Perform systems administration and IT support in a corporate manufacturing environment — hardware/software troubleshooting, network configuration, user account management, and infrastructure maintenance
- Apply security best practices to endpoint management and internal system operations, supporting organizational IT compliance and reliability
- Actively pursuing CompTIA A+ certification to formalize technical expertise in IT support and infrastructure

Product Flow Specialist | Best Buy

Nov 2025 – Present · Louisville, KY

- Manage inventory systems, product logistics, and technology operations in a high-volume retail environment with strong attention to data accuracy and process efficiency

Lot Attendant | Carvana

May – Nov 2025 · Louisville, KY

- Supported vehicle inventory management and operational workflows for a data-driven digital-first organization

PROJECTS

SQL AI Agent — Python · Gemini 2.5 Flash · Microservices —

CIS 290 – Spring 2026

- Built a two-microservice AI system converting natural language to injection-safe SQL; includes audit logging, cost tracking, and an approval workflow for enterprise deployment

GuideBook Pro — Full SDLC · UML · ERD · Agile Team —

CIS 320 – Spring 2024

- Served as Systems Architect for a semester-long fishing trip booking platform project; produced use case diagrams, class diagrams, database schemas, and UI prototypes across 5 agile iterations

FCARL IT Infrastructure Assessment — Audit · Security Review —

CIS 420 – Spring 2026

- Delivered a 20-page IT infrastructure assessment for a real non-profit client, identifying security vulnerabilities, capability gaps, and actionable technology recommendations

Machine Learning Models — Python · scikit-learn · Regression / Classification —

CIS 445 – Fall 2025

- Built a car price prediction regression model and a logistic regression classifier; applied feature engineering, cross-validation, and confusion matrix analysis to evaluate performance

CERTIFICATIONS

Microsoft Office Specialist: Excel Associate (Office 2019) · Microsoft

Earned
